

## Bet on Innovation

### TEKTÓNICA EXCEEDS THE BEST EXPECTATIONS AND RECORDS A STRONG INCREASE IN VISITORS AND EXHIBITORS

**Lisbon, May 7, 2024** – The results of Tektónica – International Construction Fair confirm a very positive outcome of the 26th edition, marked by growth in participation by companies and mainly visitors.

Promoted by the AIP Foundation, Tektónica took place between the 2nd and 5th of May at FIL, promoting the meeting point for the construction sector with an offer made up of more than 300 exhibitors, 20% of which were international.

Tektónica took place simultaneously with SIL, a bet that has boosted the business of this construction and real estate marketplace since these are two sectors with the capacity to generate synergies.

In a total exhibition area of more than 35,000 m<sup>2</sup> of exhibition space, Tektónica and SIL registered an influx of visits from professionals and the public, which exceeded 25,500 visitors.

It should be noted that 92% of professional visitors consider that the Exhibition contributes to the projection and economic growth of the sector and 94% recommend the visit to other professionals in the sector, intending to repeat the visit in the next edition.

For José Paulo Pinto, event manager, “the 26th edition of Tektónica marks another significant step in consolidating the event as a leader in the construction sector in Portugal. The emphasis given in this edition to innovation demonstrates Tektónica's commitment to valuing products, services, and equipment, as well as promoting and distinguishing companies that, in a constantly changing market, invest in the development of new solutions. Furthermore, the investment in a debate program developed in Tek Talks, on the main themes of the sector, reinforces Tektónica's position as a space for reflection and progress for the construction industry”.

#### Visitors evaluate Tektónica positively:

Of the Professionals surveyed, 97% considered that Tektónica met expectations, intend to repeat the visit, and would recommend it. The opinion of professional visitors is also unanimous, who consider that Tektónica is the biggest event in the sector taking place in Portugal.

In what reports to Público, 96% would recommend the visit to other professionals in the sector and 95% intend to repeat the visit in the next edition in 2025.

#### Tektónica Innovation Award:

The Tektónica Innovation Awards ceremony, an initiative that aims to reward and distinguish innovative companies and products, registered 40 applications, an indicator that the sector is constantly growing and changing. At this ceremony, eight awards and three honorable mentions were awarded, namely, by category, company, and product:
